Appears in Collections:	Ohio State Engineer: Volume 23, no. 1 (October, 1939)

GREETINGS

Greetings to Ohio State engineers and particularly to those starting their work in this College. You are all engaged in one of life's most stimulating and exacting occupations — namely, that of obtaining a degree in some branch of engineering. The facts you master — even the mistakes you make — will help to mold your life for usefulness to yourself and to Society. The conscientious student may at times find the load very heavy but perseverance will surely reward him at the end of his college career. To all the Dean extends best wishes and the sincere promise that he is ready to help the engineers in every way he can.

The general prospects for engineering graduates seem as bright as ever and the social significance of engineering promises to increase rather than diminish. The best of luck to you all.

C. E. MacQuigg, Dean.

Now that the Freshmen almost 600 strong have been duly launched on their college careers with appropriate words of welcome and advice and the New Advanced Students of whom there are about one hundred have likewise been made to feel at home in their new surroundings it is only meet and proper that we should say hello to the 1200 upper classmen who are returning to the campus and classroom for another year of work.

May I therefore extend to all you upper classmen a sincere and hearty welcome and wish for you a year of pleasure and profit in your chosen studies.

William D. Turnbull, Junior Dean.
